Inhouse-Paket : Auf Anfrage

Overview

Enterprise data is growing exponentially. This data explosion is making commonly accepted practices of data management inadequate. Social, mobile, cloud, big data, and analytics are driving an explosion in data volumes and causing new challenges for data protection, disaster recovery, regulatory requirements, and standards for compliance. Data management has become one of the highest priorities of organizations today.

The IBM FlashSystem products are designed to help companies improve performance and reduce server sprawl, power consumption, cooling, and floor space requirements. All of this in turn can help clients save money, improve performance, and invest more in innovation. The IBM FlashSystem family can help you take control of your storage, harness existing data, and manage your IT infrastructure in a much more cloud-like fashion. This course will aim to provide the basics of flash storage systems, specifically IBM's portfolio in this area.

Wer sollte teilnehmen:

Zielgruppe

Audience

Enrollment in this course is not restricted. Typical students may include:
• Customers
• Technical IBM personnel
• IBM Business Partner technical personnel
• IT consultants and architects

Voraussetzungen

Prerequisites

You should have a basic understanding of concepts associated with open systems disk storage systems and I/O operations.

You may want to consider taking:

Introduction to Storage (SS01G)

Trainingsprogramm

Course Outline

Course Administration and Introduction

Unit 1: An Overview of Flash Storage

Unit 2: IBM Flash Storage Portfolio

Unit 4: IBM FlashSystem 900

Video demonstrations

- Video 1 - Monitoring
- Video 2 - User Management
- Video 3 - Create Pools
- Video 4 - WIN Host Attachment
- Video 5 - Red Hat Enterprise Linux integration with IBM FlashSystem
- Video 6 - Thin Provisioning & Volume Mirroring

Objective

Demonstrate an understanding of flash storage from a technology standpoint

Summarize the benefits of IBM FlashCore technology

Recognize all the flash storage products from IBM and their benefits

Summarize the architecture of IBM FlashSystem products, including Spectrum Virtualize, and the FlashSystem 900 offerings

Demonstrate an ability to access and interact with the graphical interface of an IBM Spectrum Virtualize FlashSystem.

Summarize the various use cases of each of the FlashSystem products

Schulungsmethode

presentation, discussion, hands-on exercises

Hinweis

Further seminars from the IBM area.
