IBM SSC30G - IBM Spectrum Accelerate Implementation

A Live Online oder Präsenz

Dauer: 2 Tage (14 Stunden) Nr.: 30311

Preis: 1.600,00 € netto 1.904,00 € inkl. 19 % MwSt.

Inhouse-Paket: Auf Anfrage

Overview

This instructor led course will provide an understanding of IBM Spectrum Accelerate, an important, scale-out, software-defined storage product. It has been written to teach everything from the basics of installing IBM Spectrum Accelerate to performing advanced administrative tasks using it.

The course will attempt to clarify the concepts involved in planning, deploying, and implementing IBM Spectrum Accelerate. It will cover the basics of software-defined storage from a technology standpoint as it is today, the product architecture of IBM Spectrum Accelerate, explain its major features and benefits while showing how to implement the solution. It will also cover configurations that an administrator must be aware of by showing multiple use cases.

Wer sollte teilnehmen:

Zielgruppe

Audience

Enrollment in this course is not restricted. Typical students may include:

- Customers
- Technical IBM personnel
- Business Partner technical personnel
- Other IT specialist: consultants and architects

Voraussetzungen

Prerequisites

•Introduction to Storage (SS01G)

Always check our training web site - www.ibm.com/training

Trainingsprogramm

Course Outline

Agenda

Unit 1: Introduction to IBM Spectrum Accelerate

Unit 2: Planning for Spectrum Accelerate

Unit 3: IBM Spectrum Accelerate Implementation

Unit 4: IBM Spectrum Accelerate Administration

Unit 5: IBM Spectrum Accelerate Trouble Shooting

Lab Exercises

Exercise 1: Not used in this course

Exercise 2: Navigation and User Management in IBM Spectrum Accelerate

Exercise 3: Managing Capacity

Exercise 4: Managing Snapshots & Consistency Groups

Exercise 5: Managing Host Attachments

Exercise 7: Monitoring in IBM Spectrum Accelerate

Exercise 8: A walk-through of mirroring with IBM Spectrum Accelerate

Exercise 9: Multi-tenancy and Troubleshooting

Objective

By the end of the course you should be able to:

Demonstrate an understanding of Software-defined storage from a technology standpoint

Summarize IBM's Spectrum range of products and their benefits

Summarize the architecture of IBM Spectrum Accelerate

Integrate and deploy IBM Spectrum Accelerate in an existing storage infrastructure

Summarize the key administrative tasks that need to be performed after the installation of IBM Spectrum Accelerate

Demonstrate an ability to access and interact with the graphical and command line interfaces of the product

Summarize the various tasks that can be performed on block storage using IBM Spectrum Accelerate by

understanding various use cases

Schulungsmethode

presentation, discussion, hands-on exercises
